Displacement	27 l
Dimension	1 x 15 mm / 1 x 11 mm
Color	Orange
Material	PE
Weight	6 kg
Shipping time	3-7 days
Production time of 100 pcs	12 days

Description

The float is made of good quality polyethylene - a suitable solution for pipelines and cables floating on water. Each plastic float is made of two symmetrical parts that are attached directly to a cable or pipe and connected using galvanized screws. The plastic float is fitted to the cable and tube so it cannot slip. The orange signal color provides the plastic float with good visibility, even from long distances (other colors on request). The polyethylene float is suitable for PE pipes, but can also be fitted to steel pipe.
