Description

Technical specifications:

Material: Polyethylene

Colors: Green

Weight: approx. 10 kg

Dimensions: L/W/H = 100 x 50 x 35 cm

Thread: M10 -> also available with stainless steel thread +20 €

Total displacement: approx. 140 kg

Displacement for application: approx. 100 kg

Ponton boat middle section, suitable for constructing small boats with a low height above the water surface. Usable in water bodies with low wave action. Manufactured using a rotational process as a dense and closed structure made of polyethylene. Features integrated steel elements with an M10x25 internal thread for a permanent connection of the pontoon with the boat's steel structure. Our pontoon boat parts do not have certifications.
