Description

WASSERTANK 1500 L

The **WASSERTANK 1500 L rainwater tank** is designed for efficient above-ground storage and retention of larger volumes of rainwater collected from roof surfaces. Its capacity makes it ideal for residential, commercial and agricultural applications where higher water demand is required.

Manufactured from premium **polyethylene (PE)**, the tank offers excellent resistance to UV radiation, weather conditions and mechanical damage. The stable free-standing construction allows **above-ground installation only**, eliminating excavation work while maintaining safety and stability even when fully filled.

Technical specifications:

- capacity: 1500 litres
- diameter: 1160 mm
- material: polyethylene
- colour: grey
- outlet tap: 400 mm
- top opening with lid and transport handles

Key benefits include reduced water costs, sustainable water management, quick installation and excellent value for money. The tank supports current **EU rainwater retention recommendations**, increasingly applied in modern construction.

Applications: garden irrigation, irrigation systems, equipment cleaning, utility water storage, maintenance tasks.
Additional uses: greenhouses, ponds, agriculture, emergency water reserve, holiday properties.

We are an experienced manufacturer and distributor of rainwater management, hydrotransport and floating construction systems. We offer one of the widest product ranges in Europe, fast delivery from our warehouse, warranty coverage and **custom-made solutions**.
