Description

Aquatower 2000 Liters

The freestanding tank from the **AQUATOWER** series is designed for storing and retaining rainwater collected from the roof surface using a custom gutter system.
The tank's design allows for installation in various systems and easy adaptation to existing structural conditions. Due to their sturdy construction and small capacity, the tanks can be easily moved and relocated as needed.

Aqua Tower tanks are intended for above-ground installation only.

The top of the tank has a hole for mounting the lid and handles for positioning the tank or transporting it.

The tank includes:

Bolt-on lid
Inlet gasket (mounted in the lid) and inlet gasket
tap
Filter screen

Dimensions:

Capacity: 2000 l
Height: 2170 mm
Usable height: 1980 mm
Width: 1160mm
Length: 1160 mm
Hatch: 420 mm
Faucet height: 400 mm
